## SUMMARY

Finance and accounting professional with experience in financial analysis, reporting, and reconciliations across corporate and international trade settings; strong foundation in GAAP accounting and financial statement analysis through a Bachelor's in Accounting & Finance, MS Finance coursework, and hands on financial modelling and reporting project work. MS Finance, BU Questrom, graduated Jul 2026.

## EDUCATION

**M.S. in Finance – Boston University, Questrom School of Business, Boston, MA** **Sep 2025 – Jul 2026**

Relevant coursework: Financial Statement Analysis & Investor Decisions, Data Analytics in Finance, Fixed Income Markets

**Bachelors in Accounting & Finance – Mumbai University, India** **Aug 2021 – May 2024**

## WORK EXPERIENCE

**Forensic and Financial Crime Executive** **Jun 2024 – Jun 2025**

*Deloitte Touche Tohmatsu LLP*

*Mumbai, India*

- Performed account reconciliations and financial record reviews across concurrent client engagements, identifying and resolving discrepancies; prepared recurring financial reports and analytical deliverables for 10+ senior stakeholders under tight deadlines.
- Maintained accurate financial records and data across multiple client accounts using advanced Excel (Pivot Tables, VLOOKUP) and Python (Pandas); built automated financial reporting and data validation workflows to improve accuracy, reduce manual effort, and support timely delivery of financial outputs.
- Collaborated across finance, compliance, and operations teams to gather financial data, resolve reporting discrepancies, and provide analytical support across multiple concurrent workstreams; managed competing priorities under deadline while maintaining high standards of accuracy and attention to detail.

**Financial Analyst**

**Aug 2022 – May 2024**

*Sun Impex International*

*Mumbai, India*

- Tracked, reconciled, and maintained detailed records for invoices and payments across import/export transactions, working closely with vendors and internal stakeholders to resolve discrepancies and keep financial records accurate and up to date.
- Analysed import/export transaction costs, duties, and pricing trends across multiple product lines to support margin visibility, informed pricing decisions, and more effective cost planning for ongoing international trade operations.
- Built and maintained detailed Excel-based tracking sheets to monitor payment status, outstanding balances, and pricing data across international trade transactions, helping streamline reporting and reduce manual follow-up.

## PROJECTS

**Apple Inc. Financial Statement Analysis and Valuation**

- Built a fully dynamic 5 year DCF and pro forma financial model for AAPL using Python, analysing key business and financial performance drivers to develop fact-based multi-scenario projections; performed sensitivity analysis across discount rate (9-11%) and terminal growth (2-3%), producing an intrinsic value range of \$86 - \$114 vs. market price of \$259.

**Financial Reporting and Reconciliation Pipeline** | [GitHub](#)

- Developed an end to end Python (Pandas) pipeline and utilized Java for data extraction and analysis of 500 financial records; produced automated Excel reporting packages with variance flags, performance summaries, and fact-based recommendations supporting recurring financial analysis and process improvement workflows.

**Study on Financial Controls and Process Improvement**

- Analysed 10+ case studies and 50+ survey responses to identify systemic accounting control weaknesses and reporting gaps; synthesized findings into a structured report with GAAP-aligned process improvement recommendations, demonstrating strong analytical thinking, accuracy focus, and commitment to sound financial controls.

## LEADERSHIP EXPERIENCE

**Volunteer, Placement Cell**

**Jul 2023 – Jul 2024**

*S.I.E.S College of Commerce*

*Mumbai, India*

- Coordinated 10+ campus placement drives as primary liaison for 200+ students, managing relationships across employer and university stakeholders and reducing event turnaround time by 20% through structured process improvements.
